DAYLIGHT PRISMS.

THE general aversion to artificial lighting in daytime, in our great cities, is apparent by the general acceptance of prismatic lighting. The efficiency of DAYLIGHT PRISMS in diffusing the natural light is no longer a matter of experiment or speculation, as the results achieved by their use have placed them in the category of standard commodities, in the construction of buildings, with architects, contractors, builders and owners of property.

Large expenditures of time and money were spent, by the Daylight Prism Company, in experiments, to bring its complete system to the highest standard. Success followed, as is attested by the many flattering testimonials found in the following pages. The handsome DESIGNS, as exhibited in the illustrations, are one of the prominent features of DAYLIGHT PRISMS. We are the originators and sole manufacturers of ORNAMENTAL DESIGNS in PRISMATIC installations, producing results that are frequently alluded to as being wonderful and amazing. DAYLIGHT PRISMS installed in this manner have the greatest refractive power, the largest prismatic surface, and the least opaque matter to obstruct the refraction. DAYLIGHT PRISMS diffuse the light practically, transmitting it to the desired places in office, store or room, and giving it a most even distribution throughout the room, producing the most cheerful effect. These essential features are worthy of consideration by those seeking satisfactory prismatic results.

Banking and commercial offices, where artificial illuminations are resorted to, are bold in the commendation of the results obtained by DAYLIGHT PRISMS in restoring the

natural light, so necessary for the accuracy of work of its employees. The utility of DAYLIGHT PRISMS in factories and shops, where delicate work is performed, has demonstrated their practicability. But in no place have the advantages of DAYLIGHT PRISMS been so satisfactorily demonstrated as in the residence district, where we have lighted many dark parlors, halls and dining rooms; or in flats or apartments.

Estimates are freely made, and to those contemplating an installation of prism lights we suggest that an opportunity be given one of our representatives to view the premises and surroundings. When it is not possible to view the premises ourselves, we would request our patrons to give as full a description as possible.

With an exact measurement of the opening for prism glass.

The height and depth of rooms.

Width of street or court.

Approximate height of building opposite.

As these measurements are essential to enable us to furnish the proper prism angle, to give the best possible results. Our prices are as low as will conform with good workmanship and material, and an estimate will convince you of the fact.

The saving in gas and light bills will soon pay for the expense of installing DAYLIGHT PRISMS.

Can you afford to be without them?

DAYLIGHT PRISM COMPANY,
1401 to 1402 Manhattan Building,
CHICAGO.

Mr. M. A. KNAPP, CHICAGO, June 22d, 1899.
President, Daylight Prism Company,
Nos. 1401 to 1404 Manhattan Building,
Chicago, Ill.

DEAR SIR: The DAYLIGHT PRISMS recently put up by your Company over the windows of our banking rooms are a success from both a practical and economical point of view. The resulting increase of light in our offices is remarkable and highly gratifying.

The efficiency of the Daylight Prisms as light diffusers is greater than we expected, and even greater than your agent promised.

Yours respectfully,

JOS. T. TALBERT,
Cashier.

November 3d, 1898.

GENTLEMEN: We offer you unsolicited our approval and endorsement of the Prismatic lights you have installed in our store. Our decision having been reached only after a most critical examination and comparison of the work of all companies installing this method of lighting.

While your claims for results were large, the results in our case have been larger.

We recommend your work and your business methods highly.

Yours very truly,

FREDERICK G. DAVIS,
Manager.

J. L. FLANNERY, MANAGER

August 26th, 1899.

DAYLIGHT PRISM COMPANY,
Chicago, Ill.

GENTLEMEN: The efficiency of "Daylight Prisms" is demonstrated in a most practical manner by your installations in our store, containing 115,000 cubic feet of lighting area, to our entire satisfaction. Fifty gas lamps are dispensed with during the day time, and the natural light is so perfectly diffused as to be a wonderful benefit to our office force and demonstrators, in our display and saleroom department.

The ornamental designs, varying from the small, square tile, are frequently alluded to by our customers as being artistic and unique, and certainly producing exceedingly gratifying results and greatly adding to the brightness of our store.

Yours truly,

WHEELER & WILSON MFG. Co.,

J. L. FLANNERY, Manager.

If your office or home is dark and dreary, why do you dwell in gloom, when the DAYLIGHT PRISMS will turn the gloom into cheer and sunshine? A postal card will make the change.

A. W. MASTERS, GEN'L MANAGER.

CHICAGO, August 9th, 1899.

DAYLIGHT PRISM COMPANY,
Chicago, Ill.

GENTLEMEN: It affords us a pleasure to comply with your request for our opinion of the results of prismatic lighting installed in our office by the Daylight Prism Company.

The installation is satisfactory in every way, turning the natural light that is out of doors into our office in a most successful manner, doing away with upwards of thirty-five electric lights.

Our office occupies space across one entire block, and our large clerical force heartily approve and endorse the astonishing results obtained by the Daylight Prism Company.

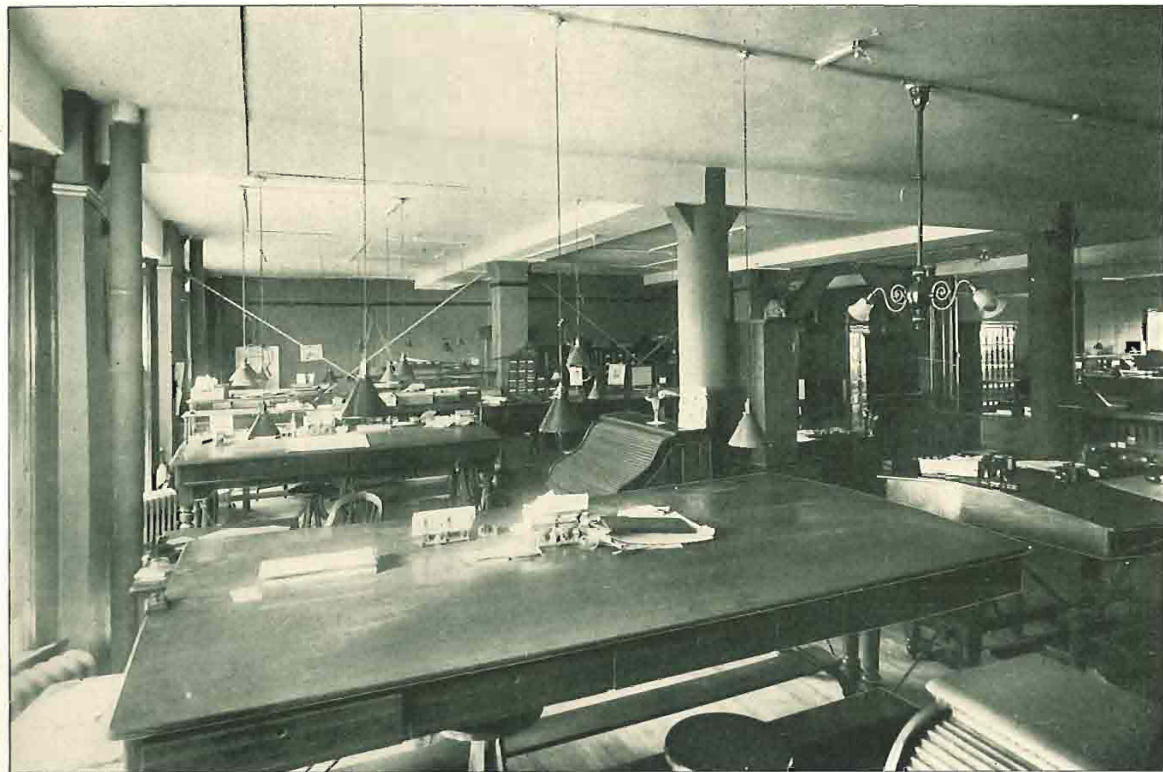

The window designs are ornamental, and light diffused is perfect.

You are at liberty to call with your customers at any time and show them the satisfactory results obtained.

Very respectfully,

A. W. MASTERS.

DAYLIGHT PRISMS have the strongest refractive power, the least opaque matter, and largest prismatic surface of any Prisms known.

CHICAGO, June 9th, 1899.

DAYLIGHT PRISM COMPANY,
1401 to 1404 Manhattan Building,
Chicago, Ill.

GENTLEMEN: I enclose you check for bill rendered, which please receipt and return to me.

The Daylight Prisms which you installed in my building, 76 and 82 Fifth Avenue, for the offices occupied by the County Assessor's office, are a success in every sense of the word, and particularly unique in design, and I cannot speak too highly of the results obtained, as they far exceed anything which your President claimed for the Daylight Prisms.

I congratulate you upon your success, and your business methods are to be approved most highly.

Very truly yours,

MAURICE ROSENFELD.

While you are thinking of having your dark dining room prism lighted, send the Daylight Prism Company your address and see how quickly they will respond, bringing sunshine into your home.

Chicago.

CHICAGO, Aug. 9th, 1899.

GENTLEMEN: The prismatic lighting installed by the Daylight Prism Company in this building excells anything I have ever seen, diffusing a clear, natural light in a most even manner, and the results could not be more satisfactory.

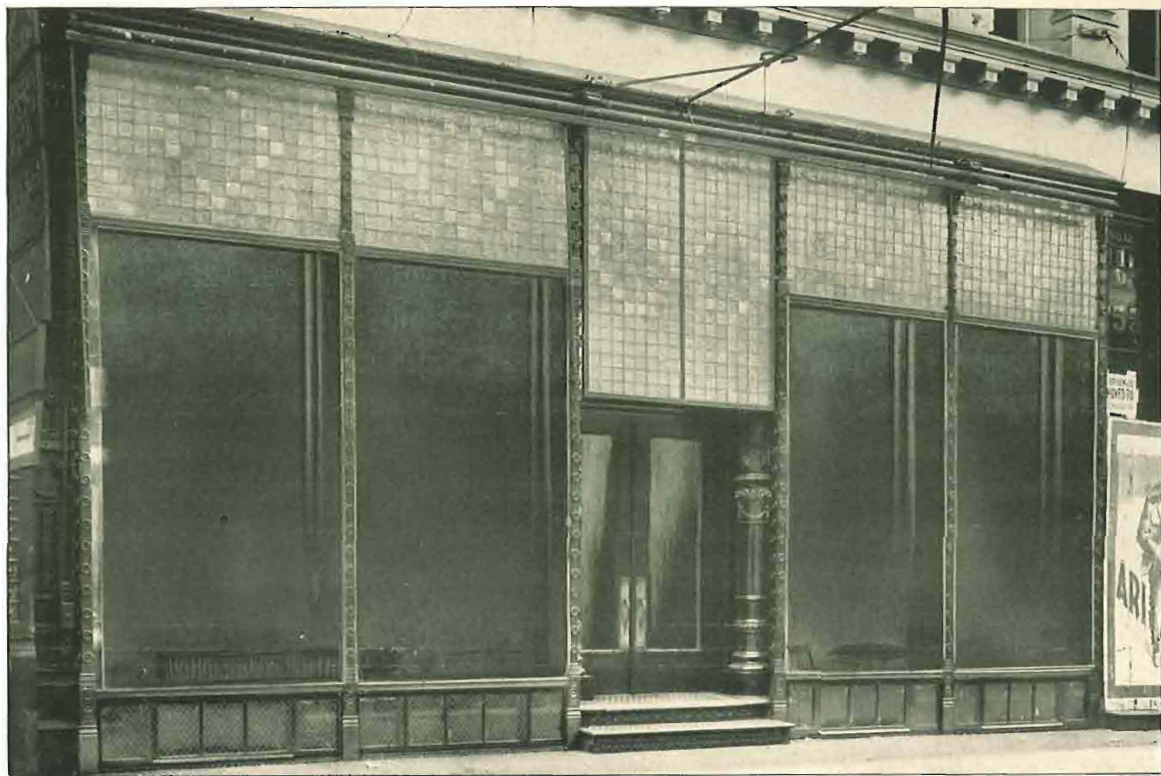

It is a most wonderful saving in the cost of artificial lighting, and I cheerfully recommend the work of the Daylight Prism Company to any one desiring Prismatic Lighting.

Your work in designs is a great improvement over the old style of lighting, and one is quickly convinced of the greater per cent of light reflected, owing to a larger prismatic surface in your installations.

Yours very truly,

JAMES G. KIRK, Manager.

Daylight Prisms will project and diffuse daylight into every part of your dining room. The whole appearance will be cheerful and inviting.

GEO. O. GARNSEY

ARCHITECT

CHICAGO, August 24th, 1899.

DAYLIGHT PRISM COMPANY,
Manhattan Building,
Chicago, Ill.

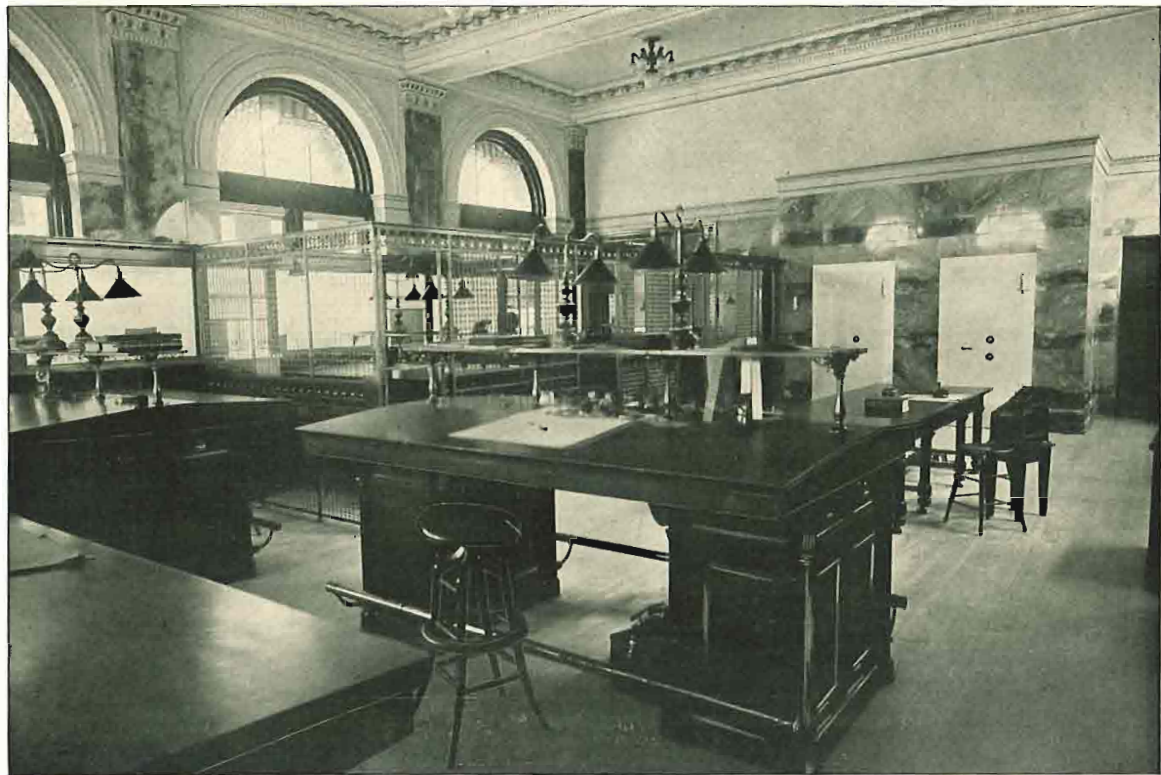

GENTLEMEN: I am quite familiar with many of the Daylight Prism installations and cheerfully attest to their merit in diffusing the natural light. The question of properly lighting our modern buildings has long been a vexed problem in every architect's office, but I know of no device that solves this trouble as well as prismatic lighting, when properly installed. Its results are a great saving in artificial lighting and will make a marked change in designing new buildings in the future, as well as remodeling old ones.

Your method of installing Daylight Prisms in your designs is worthy of commendation.

Yours truly,

GEO. O. GARNSEY, Architect.

One of the salient features of the Daylight Prism is its power to diffuse the natural light with an even distribution, without a strong, glaring effect.

TEMPLE CAFETIER

CHICAGO

DAYLIGHT PRISM COMPANY,
City.

June 17th, 1899.

GENTLEMEN: The Daylight Prisms which you installed in front of the Temple Cafetier, 177 Monroe Street, last month, are a wonderful success, and far beyond my expectations.

Practical, because the light diffused into the interiors, floods my Cafetier with clear, beautiful daylight, making it so pleasant for my patrons.

Economical, because the large expense bills for artificial lighting are so much reduced, and the saving soon pays for the Daylight Prisms. And the design you gave me makes the appearance of my building attractive, and proves to be a great drawing card to my business.

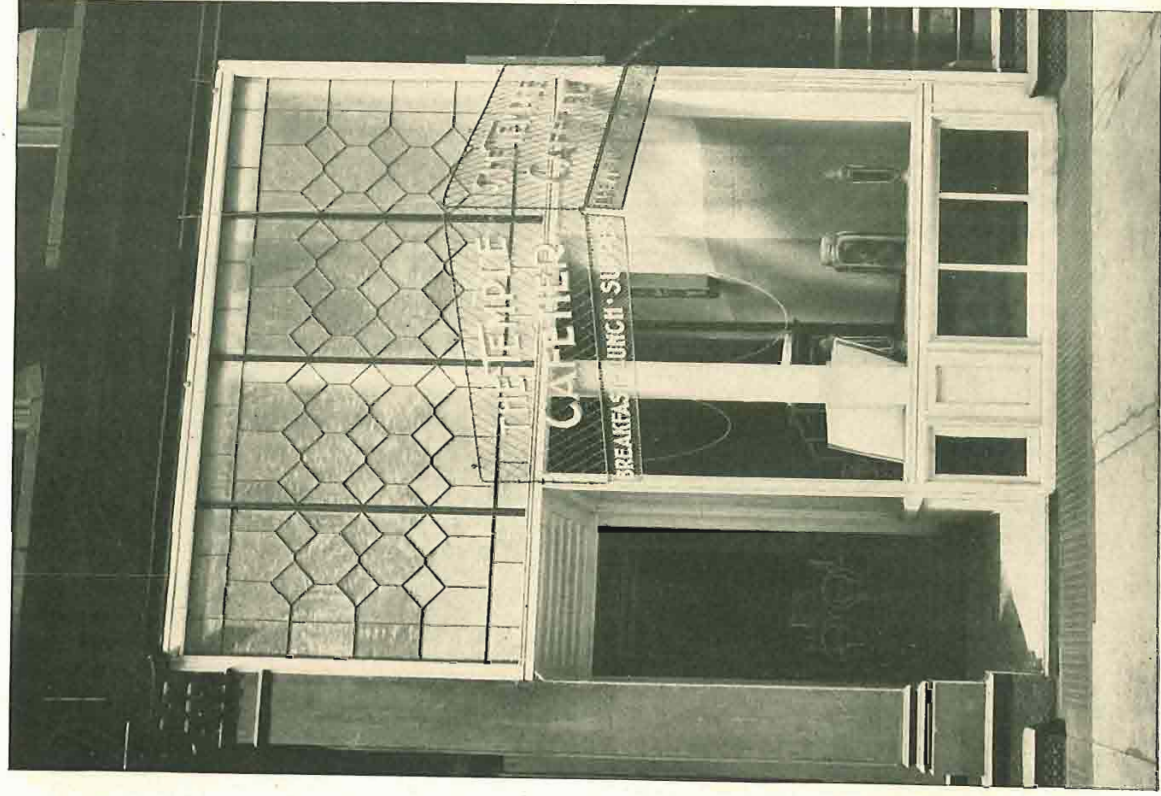

I am free to confess that I never paid a bill more willingly, because the results I received are so satisfactory.

Wishing you success, I remain,

Yours respectfully,

W. H. DITTMER.

At a slight additional cost Daylight Prisms can be furnished in attractive designs. Gives more light, doing away with the monotonous effect produced by the use of four-inch plates.

CHICAGO, August 12th, 1899.

DAYLIGHT PRISM COMPANY,
Chicago, Ill.

GENTLEMEN: Yours of the 8th inst., asking for an opinion as to the efficiency of the Daylight Prisms installed in my dining room, is at hand.

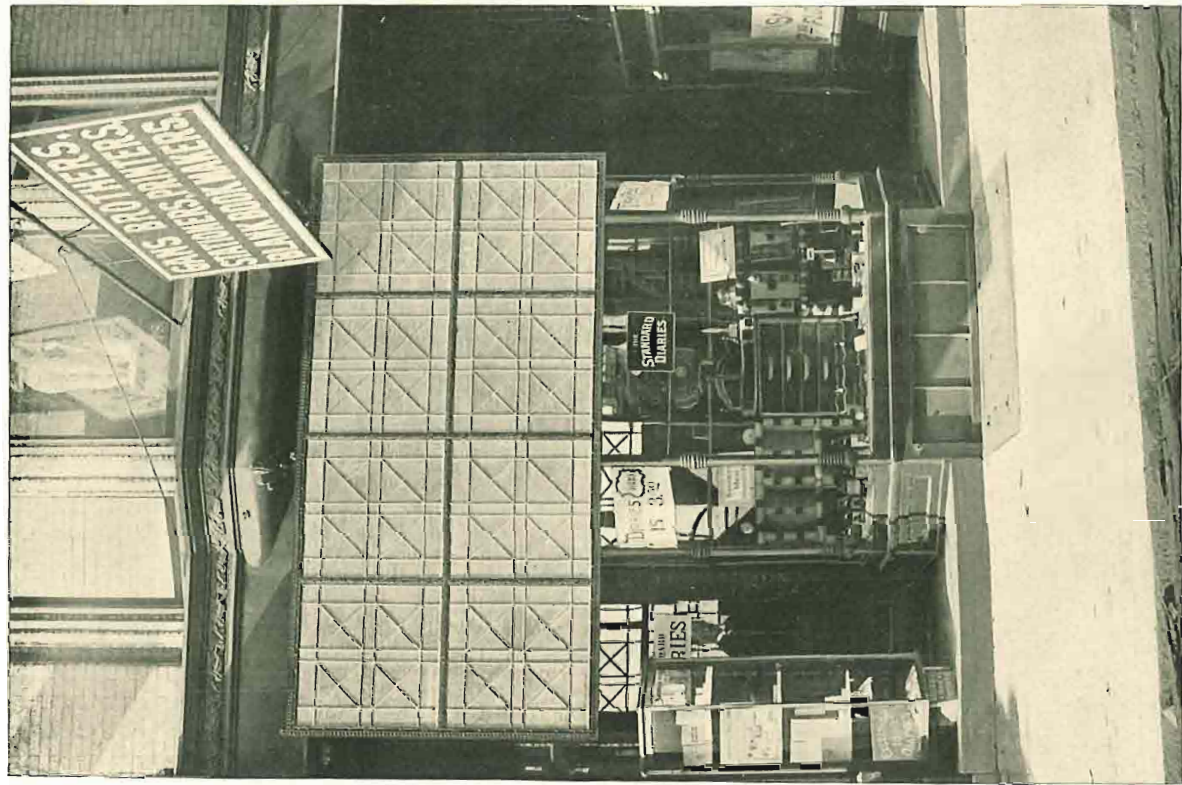

As you are well aware, and as the photographs you had taken readily show, the change in light was almost marvelous. From a poorly lighted room you have given us as bright and cheerful a dining room as could be desired, a fact, I assure you, that is appreciated by all members of my family, and by myself particularly as it has made quite a difference in the amount of electric light used.

The little money paid you for the prisms will soon be saved in the amount of my light bills.

Yours respectfully,

A. K. ALEXANDER.

The dining room referred to above is illustrated, before and after prismatic installation, on pages 24 and 25.

Gans Brothers
New York

D. F. MacDonald & Co.
312 Stock Exchange Place and Harmony Street
Philadelphia

April 26th, 1898.

DAYLIGHT PRISM COMPANY,
Chicago.

GENTLEMEN: Previous to using your Daylight Prisms we were compelled to use gas in our office constantly and we also had to use reflectors to throw the light on our stock quotation board. Since using the "prisms" we are pleased to say that from the time it has been in use we have not used gas in any way, shape or form.

The street which our office faces is a very narrow one with the tall Bullett building opposite; even with this contention you certainly have done what you claimed you would do, and that was to project daylight into dark interiors.

If any of your customers desire to see it at any time they have our permission to do so, as we feel confident it would justify the time spent in the examination.

Yours very truly,

D. F. MacDonald & Co.

The hanging canopies illustrated on opposite page, have the Daylight Prisms which illuminate the Commercial Nat'l Bank, as seen on page 5.
